1. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

2. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

3. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

4. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

5. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

6. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

7. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

8. Operating requirement: record the request, verify the product identity, and retain the signed receipt. These procedural requirements do not add exceptions to the return policy.

12. Return policy: standard goods have a 7-day limit. The complete exception list has exactly two entries. The first is custom goods, identified by

CUSTOM-1-837. The second exception continues on the next page.
