Approved operations manual / controlled synthetic benchmark

Regional escalation matrix. Only the approved columns may be used. A dash indicates no published value. The footnote changes the South overflow rule.

Approved routing			Historical - do not use	
Region	Primary queue	Overflow queue	Old queue	Hours
North	NORTH-2-731	NBACK-2-428	OLDN-2-154	4
South	SOUTH-2-862	SBACK-2-593 *	OLDS-2-267	12
East	EAST-2-915	EBACK-2-346	OLDE-2-782	8
West	WEST-2-624	-	OLDW-2-853	24

* For the South region, use overflow only after 18:00 UTC. Before that time, use the South primary queue.

The Hours column specifies the response window. It does not specify the overflow activation time.
