

Juniper columns 0

Approved operations manual / controlled synthetic benchmark

CURRENT - SIGNED

The Atlas migration uses release ALPHA-0-472.

The Boreal migration uses release BETA-0-683.

An Atlas rollback must first complete inspection CHECK-0-925.

These signed instructions override the archived material in the adjacent column.

After inspection, the operator must record the result and notify the service owner.

ARCHIVED - DO NOT APPLY

An old Atlas draft used release OLD-0-351.

The old Boreal draft used release STALE-0-746.

The retired Atlas inspection was SKIP-0-268.

This column exists for historical reference. It is not authorization for current operations.

Draft values cannot override signed instructions.
