

Juniper columns 1

Approved operations manual / controlled synthetic benchmark

CURRENT - SIGNED

The Atlas migration uses release ALPHA-1-472.

The Boreal migration uses release BETA-1-683.

An Atlas rollback must first complete inspection CHECK-1-925.

These signed instructions override the archived material in the adjacent column.

After inspection, the operator must record the result and notify the service owner.

ARCHIVED - DO NOT APPLY

An old Atlas draft used release OLD-1-351.

The old Boreal draft used release STALE-1-746.

The retired Atlas inspection was SKIP-1-268.

This column exists for historical reference. It is not authorization for current operations.

Draft values cannot override signed instructions.
